

Propositions

accompanying the dissertation

TITLE

OPTIONAL SUBTITLE

by

Felix Erik SCHMIDT

1. Proposition 1.
2. Proposition 2.
3. Proposition 3.
4. Proposition 4.
5. Proposition 5. Instead of focusing on PDF, jupyter notebooks should be the preferred format of a PhD dissertation.
6. Proposition 6. Researchers who do not publish all of the raw data, measurement and analysis scripts, as well as fabrication and measurement setup details accompanying their papers and theses, openly accessible, actively slow down scientific research.
7. Proposition 7. Cleanroom fabrication should play an equally important role in publishable work as simulations and theory.
8. Proposition 8. A lack of closely followed standards and practices in research (as compared to company guidelines) can severely hamper scientific progress.
9. Proposition 9. Every PhD student should be assigned one postdoc for the first two years of their project, unless the PhD student doesn't feel the need.
10. Proposition 10. While the Dutch train system may be equipped for daily commute, it is completely incapable of handling long distance travel.

These propositions are regarded as opposable and defensible, and have been approved as such by the promotor prof. dr. G. A. Steele.
